

# The Vivisection Industry

The multi-billion dollar vivisection industry promotes animal experiments in order to sell their products – some are instruments of torture. Here are only few devices in their massive product line. Animal breeders and equipment/cage manufacturers are rich and powerful industries. There are many reasons why vivisection continues but by far the most important is money. The biggest promoter is the chemical/pharmaceutical industry. Animal tests help them speed new drugs to market and provide a legal defence.

Photos starting top clockwise: Tail clipping restraint; psychology test equipment; Hot/Cold plate; Primate restraint "chair", metabolic cage unit; stereotaxic "instrument"; treadmill; surgery board; exposure restraint tube and tail suspension box.

**Should students and vivisectionists be above the law or should they be charged with cruelty to animals?**
