

May 10, 2008 Wildlife Report

On May 10th Liferforce was out testing our new boat for our 2008 Lifewatch Boater Awareness Program. Our operator took this photo of J pod at 5PM in waters off the North Arm of the Fraser River, BC.

It's going to be great to return to helping to protect orcas by making sure that all are following the whale watching guidelines. It has also been a pleasure watching large numbers of Harbour porpoises (with at least one baby) in waters off Point Roberts for the past few weeks. While sitting on the beach and watching them frolic in the rip tide we are constantly asked if they are whales. We distribute our Whale Watch Guidelines that illustrate the species commonly seen in local waters to these folks so they can learn more about the marine wildlife.

For Freedom,

Peter Hamilton
