

World Week for Animals in Laboratories

April 18 to April 26

Broken Promises

Over 2.5 million animals are killed every year in Canadian labs. It's funded by governments, health organizations, businesses and public donations. Dogs and cats are seized from pounds. The number of animal victims increase every year. There has not been a phase out of cruel, scientifically fallacious "animal models" even though humane, reliable, non-animal methodologies are available. The multi-billion dollar vivisection industry police themselves! Help stop this scientific fraud that harms both people and animals.

Contact your politicians and those who fund vivisection.
